

- HOW TO - MAINTAIN YOUR

TRIUMPH

It's no secret that a clean bike is a fast bike, and it's an ethos which Muc-Off share closely with Triumph. Keeping your ride in prime condition is what it's all about, so here's a handy guide featuring our key maintenance products which we know will keep your machine looking like it's rolled out the showroom. Inspired by our simple three-step Clean, Protect and Lube Process. This Cleaning guide will steer you every step of the way.

Let heavy maintenance be the thing of the past and get back to what you do best...riding!

HOW TO CLEAN YOUR TRIUMPH

STEP 1 CLEAN

Ensure your Triumph is completely cool before applying Chain Cleaner to chain and sprockets (agitate with brushes).

Use our Motorcycle Chain Brush to agitate.

Deep clean your Triumph's engine and heavily soiled areas using the Motorcycle Bio Degreaser (agitate with brushes).

Hose off degreased areas and pre-wet your whole Triumph before the next cleaning stage.

Completely coat your Triumph with Nano Tech Motorcycle Cleaner. Make sure your ride is cool and out of direct sunlight.

For best results try our brushes, sponges, and wash mitt to remove build up of dirt and grime.

Rinse the whole Triumph with fresh water being careful not to blast delicate areas. E.g bearings and electrics.

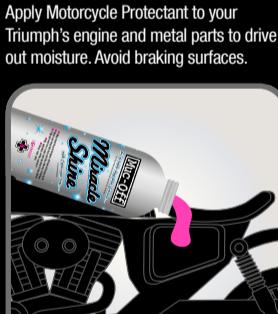

Clean your disc brakes and pads using Muc-Off Disc Brake Cleaner, then wipe away excess fluid.

HOW TO PROTECT YOUR TRIUMPH

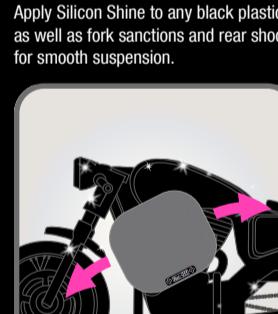

STEP 2 PROTECT

Spray MO-94 over your sprocket and chain to drive out moisture. Avoid braking surfaces.

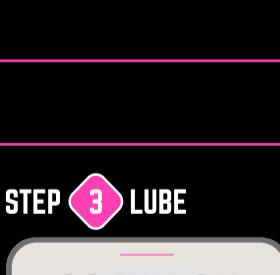

Apply Motorcycle Protectant to your Triumph's engine and metal parts to drive out moisture. Avoid braking surfaces.

Apply Silicon Shine to any black plastics as well as fork sanctions and rear shock for smooth suspension.

Apply HCB-1 for the ultimate 12-month protection for your Triumph. Spray on the surface you want to protect and allow to cure for 24 hours for best results. Avoid braking surfaces.

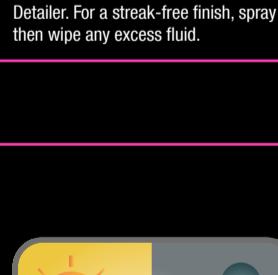

Use Speed Polish on fairings and Paintwork for a rapid shine.

Apply Miracle Shine to keep your Triumph looking showroom ready.

Wait until polish begins to haze before gently buffing away with a Microfibre cloth.

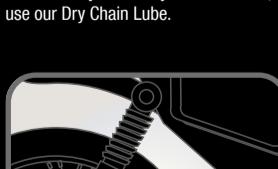

Keep your Triumph's stylish Matt Finish in top condition with the Matt Finish Detailer. For a streak-free finish, spray then wipe any excess fluid.

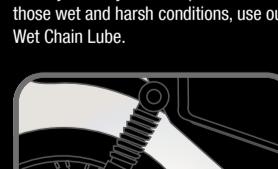

HOW TO LUBE YOUR TRIUMPH

STEP 3 LUBE

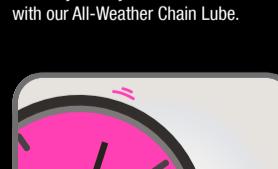

SO WHICH CHAIN LUBE DO I USE?

For those dry and dusty summer rides, use our Dry Chain Lube.

When you and your Triumph take on those wet and harsh conditions, use our Wet Chain Lube.

Be ready for any condition and distance with our All-Weather Chain Lube.

For all off-road conditions, use our Off-Road All-Weather Chain Lube (perfect for Triumph Tiger 800 XC riders!).

Spray the lube over your Triumph's chain.

Wipe away excess lube with a Muc-Off Microfibre Cloth.

Wait at least 15 minutes before hitting the road! For best results leave overnight.
